INVESTIGATIONS
DURING CONGRESS

(Continued from page 1)

beginning in December, 1911, and running through the last of August, included the following:

Increase in the size of the house of representatives, from 395 to 545 members.

Age and service pension law, increasing Civil war pensions.

Eight-hour law covering government contracts.

Admission of Arizona and New Mexico to statehood.

Use of poisonous white phosphorus in match-making prevented by excessive tax.

Pure drug law amended to prevent misleading labels on patent medicines.

Wireless communication brought under careful regulation, the law requiring the wireless on all ocean vessels to be adequately manned.

Government transports required to carry an ample number of lifeboats.

Red Cross recognized officially as branch of government service in time of war.

Federal relief given to 1912 flood sufferers in lower Mississippi valley.

Commerce court and tariff board virtually legislated out of existence.

Industrial commission authorized, to study relations between capital and labor.

This congress has witnessed the ratification of many important treaties with foreign nations. The arbitration treaties with France and Great Britain, negotiated by President Taft, however, were not ratified, because the senate so amended them that the president considered they did not carry out the understandings made with the two powers.

In the two years, however, the following important agreements have been perfected:

Pecuniary treaty with Great Britain.

North Atlantic coast fisheries agreement with Great Britain.

Fur seal treaty with Great Britain, Russia and Japan.

International wireless treaty with leading foreign nations.

International war prize agreement.

International agreement covering sanitary measures for the control of epidemics.

General arbitration treaty with France extended to 1918.

Copyright treaty with Hungary.

International agreement covering assistance and salvage at sea.

Investigations covering a wide range of important subjects were conducted. In addition to those enumerated (the "money trust," campaign expenditures and steel inquiries), special committees and the regular standing committees of the two houses have conducted the following:

Tariff hearings, by ways and means committee, in preparation for new democratic tariff bills.

Currency hearings, preparatory to framing monetary reforms.

Investigation of affairs of American Sugar Refining company, and its alleged domination of the market.

Inquiry into the Titanic disaster.

Investigation of conditions along Mexican border, and alleged financing of Mexican revolutionists by Americans.

"Shipping trust" inquiry, to determine extent of the common control of ocean routes.

Investigations of Indian affairs, on various reservations, and at Washington.

Investigations of agricultural, treasury, and other government departments.

Investigation of land grants about Controller bay, Alaska.

President Taft has used the veto power freely throughout the congress. Fully 20 bills have met his disapproval, including democratic tariff bills; appropriation bills which contained commerce court, civil service and army reorganization and legislation of which he did not approve; waterpower bills in which the principle of federal control was not recognized; and the immigration bill containing the "literacy test" feature.
